

## Basic Aquatic Shield – Testprogramma voor Lightsensor

```
/**  
Testroutine V2 geschreven door tomvanloon2 at hotmail.com  
**/  
  
int light1 = 3; // ( A3 verbonden met lightsensor )  
  
void setup() {  
  Serial.begin(9600);  
}  
  
void loop() {  
  int value = analogRead(light1);  
  Serial.println(value);  
  
  delay(100); //only here to slow down the output so it is easier to read  
}
